

# MAN UNDERWATER

Manitoba Underwater Council

Summer 2010

Volume 40, Issue 2

On Saturday May 15<sup>th</sup> more than a dozen divers from various dive clubs throughout Manitoba gathered to place the many dive buoys that mark the sanctuary we all know as Cat's Ass. Since this is a cumbersome chore, the many divers that volunteered their precious time to place these floats are much appreciated. These markers are a strong symbol of the commitment that MUC has towards dive safety. In the coming months MUC will be purchasing more of the new buoys in keeping with the same style as parks Manitoba beach marker buoys. This will help ensure adherence by boaters with a more common boundary. I am hoping for another great turnout this fall to help take these buoys out of the lake. Again, many thanks to all who assisted with the dive markers.
